

## GENSETS / TRADING

When the grid fails, Hitzinger is at your side. The worldwide operating company offers you back-up or emergency power units at highest level, tailored exactly to your needs. Big power from a big player this is the demand you can make to us in every situation for every need.

## Systems in different designs

Hitzinger-Gensets are offered for various application possibilities:

- **open gen sets:** for stationary operation
- **sound-proof gensets:** with weather protected enclosure for outdoor placement.
- **Container-model:** Genset built in into a standard container
- **Mobile gensets:** on chassis or mounted on a truck.

**What our gensets offer:**

- Diesel driven
- Nominal power: 25-2500 kVA
- Voltage up to 1000 V

- Frequency 50-400 Hz

**How to be other than the others**

**Hitzinger does not just supply standard products but also individual solutions for:**

- Low exhaust gas emission
- Higher sound proofing
- Extreme environmental conditions (heat, cold)
- Low weight
- EMC- and EMI-conditions
- NEMP-protection
- Shock and vibration resistance
- Special maintenance demands (remote,...)

**Automation Everything is possible**

The control of all Hitzinger gensets is the easiest thing in the world and though offers all features of modern communication.

With the Hitzinger Powercon as a central control unit and interfaces to the Hausleittechnik, remote diagnosis via modem, error surveillance via cellular or condition logging with or without printer everything can be realized.

**Both simple supply or complex implementation everything is possible.**
