

Designs Central Systems

Stationary converter

Input/Output:

50/400Hz or 60/400Hz

output power:

up to 315 KVA

up to 25 units parallel

design:

internal implementation

horizontal or. Vertical design

life cycle:

>25 years

400 Hz distribution

Equipped with:

- 400 Hz distribution fields
- droop compensation
- control fields
- data transmission
- room ventiation

Distribution switchpanel 400 Hz (Bridge)

- 960/200V or 575/200V

- up to 140 kVA

Distribution switchpanel 400 Hz (Apron)

- 960/200V or 575/200V

- up to 140 kVA
