

**STATIONARY CONVERTER:  
TECHNICAL LEADERSHIP "MADE BY HITZINGER".**

**Converter from Hitzingger are known not only for their technical design but most of all for their proofed failsafe operation. The Hitzingger engineers have created a rotating converter at a high level of stability and low level of wear and maintenance.**

Stationary frequency converter, 50/400 Hz 10 - 200 KVA

**OPTIONS:**

- other input volatgages / frequencies but 400 V, 50 HZ
- second output (normally beyond 90 KVA)
- remote control
- Transformator-Start 1,5 x Inom

**Features:**

- Nominal power: 10 - 200 KVA
- Converter and switch panel built in in soundproof enclosure
- Guided control software
- Operation safety, total protection and surveillance with microprocessor control
- Easy-of-access parts supports maintainability
- Life cycle > 25 years
- High operation safety
- MTBF-value 50000 hrs
- Low harmonics lower than 1,5 %
- Radio interference suppression
- Error logging
- interface
- design according DFS 400
